ABSTRACT / ABSTRAK

Departing from the budget deficit of BPJS Kesehatan which has continued to occur since its implementation in January, 24-25 2022 continues to experience an overall budget overrun. Several hospitals in Indonesia are also feeling the impact of the budget deficit. Therefore researchers conducted this study to find out how it impacts. This aims to knowledge for participant to the impact of BPJS Kesehatan's budget deficit on health services. The steps taken in serving patients, both patients who are BPJS Kesehatan participants or general patients who continue to serve patients despite the budget deficit of BPJS Kesehatan are very good and noble steps. The Government through BPJS Kesehatan should do other ways to overcome the problem of BPJS Kesehatan's budget deficit so as not to burden hospitals. And, payments for hospital claims are adjusted to mandatory payments each month.

1. BACKGROUND

In order to provide national health services that are more equitable and accessible to all groups, and help the people, using the principle of help-help or mutual assistance, all will be helped. The presence of the National Health Insurance Agency (JKN) which is shaded by government agencies through the National Health Social Security Organizing Agency (BPJS), since 2014 the Government has authorized and at the same time implemented and implemented the National Health Insurance in 2014.

As a system responsible for BPJS, JKN is applied with the principles of cooperation, non-profit, mandatory participation, danaarnanat, and the results of managing social security funds are used entirely for program development and for the benefit of JKN BPJS Kesehatan participants.

The purpose of health services as mandated in the Health Law is to increase awareness, willingness, and ability, healthy living in order to realize the highest degree of public health as an investment in the development of socially and economically productive human resources. Health insurance is a guarantee in the form of health protection so that participants get health maintenance benefits and protection in meeting basic health needs.

2. METHOD

The community service method is in the form of training on the preparation of an annual work plan at Juanda Health Center as many as 35 people. Meanwhile, the method of activity with the schedule of events is as follows: 1) Opening 2) Singing the song Indonesia Raya 3) Remarks by the head of the community service committee and the head of the zoom 4) JKN system development strategy as a solution to bpjs deficit 5) Question and answer session 6) Concluding.

3. RESULT AND CONCLUSION

The results of this community service show that the JKN system development strategy as a solution to bpjs deficit for the ITKES Wiyata Husada Samarinda health administration study program were 35 people. Based on the following table 1:

Table 1 Frequency Distribution Based on Presentation

Method	Frequency	Percentage
JKN system development strategy as a solution to bpjs deficit	I am understand JKN system development strategy as a solution to bpjs deficit	100.0
	I am not understand JKN system development strategy as a solution to bpjs deficit	0.0
Total		100.0

Source : Primary data, 2022

Based on table 1, it can be concluded that the presentation of percentages such as exposure in the form of *powerpoints* that are the most in community service is that participants understand procedures for the implementation of cleft lip and cleft sky social service, namely 35 respondents (100%) and those who do not understand procedures for the implementation of cleft lip and cleft sky social service as many as 0 respondents (0%).

The budget deficit of BPJS Kesehatan is a form of immaturity in the implementation or implementation of the BPJS Kesehatan program whose real purpose is to provide social justice for all Indonesians with the principle of help-help. The occurrence of this budget deficit has many causes. One of them is due to the large number of participants who are in arrears or do not pay the monthly premium contributions that have been set and agreed upon together. Therefore, of course this will result in everyone who is a participant and at the same time a patient of BPJS Kesehatan. Of course, this condition is unsafe and poses a threat to the implementation of BPJS Kesehatan which was originally to help sesame, and in the end services in the hospital became irregular, either in terms of intensive treatment or other types of treatment.

4. SUMMARY AND ADVICE

Based on conclusions and suggestions related to ‘‘JKN system development strategy as a solution to BPJS deficit’’ went well. On the indicator of the accuracy of the target of community service participants at ITKES Wiyata Husada Samarinda, in procedures for the implementation of solution to bpjs deficit.

5. ACKNOWLEDGE

Undergraduate Study Program in Health Administration ITKES Wiyata Husada Samarinda would like to thank all participants of the zoom who have supported this community service activity so that it runs well and smoothly.
